

Posters VSD 2023 (v.100523)

- 1 **Fenne Verheijen**
Glutamate as a potential marker for toIDC metabolism
- 2 **Hans Vernooij**
Report your research
- 3 **Xinyi Pei**
Extracellular vesicles released by picornavirus-infected cells trigger an antiviral response in immune cells
- 4 **Aram Swinkels**
The selective effect of antimicrobial residues in relation to resistant bacteria
- 5 **Thomas Brand**
Identifying individual senescence-associated factors that hinder liver differentiation
- 6 **Abel Vlasblom**
The respiratory microbiome of piglets displays temporal development and harbors strains with putative probiotic use against common respiratory pathogens.
- 7 **Isaura Wayop**
Applying Implementation Mapping: developing the intervention program for the Streptococcus suis clinical practice guideline in weaned pigs
- 8 **Tijs Tobias**
Serendipity in teaching pig health; a case of cystic hygroma in a suckling pig
- 9 **Tobias Pieper**
Hepatic stellate cells stimulate hepatic progenitor cell proliferation in a ductular reaction model
- 10 **Bijan Godarzi**
A lateral flow microarray to detect WNV and USUV NS1-specific antibodies across species
- 11 **Nina Hoogland**
Isolation of hepatic stellate cells from different animal species to study the translatability of research on the treatment of liver fibrosis.
- 12 **Alice Musi**
Plasma mRNA levels of CDC6 decrease in response to chemotherapy in canine lymphoma patients
- 13 **Thi Minh**
Stable isotope profiles of glucose and glutamine reveal unique nucleotide metabolic remodeling by CD27 costimulation in human CD4+ and CD8+ T cells
- 14 **Maria Matamala Montoya**
Metabolic changes underlying drug resistance in the Multiple Myeloma Tumor Microenvironment
- 15 **Xiaoqian Gong**
Development of nanobody-based assays to distinguish extracellular vesicle-enclosed virions from naked viruses
- 16 **Jung-Chin Chang**
NASH-in-a-dish: Identifying targetable metabolite crosstalk for NASH treatment
- 17 **Demi Rijlaarsdam**
Metabolic crosstalk between hepatic stellate cells and hepatocellular carcinoma cells
- 18 **Kacper Libera**
Pre- and post-slaughter wings and legs fractures in broiler chickens – can computed tomography (CT) be a potential solution to monitor this animal welfare issue at the slaughterhouse?
- 19 **Peilin Liu**
Molecular markers of persistence in Campylobacter Infections
- 20 **Esther Hindriks**
Expression of tumor associated antigens in canine melanoma and normal tissue
- 21 **Kathryn Wierenga**

- 22 A novel drug to treat cancers with amplification of the E2F3 gene
Lonneke Nouwen
Modulation of nucleotide metabolism by picornaviruses
- 23 **Niels Dekker**
Diversity of Dichelobacter nodosus serogroups in footrot lesions on sheep farms in the Netherlands
- 24 **Luuk van Damme**
Source attribution of Salmonella Enteritidis using machine learning
- 25 **Sara Wijburg**
Which gardens are preferred by rodents? Relationships between rodent presence and characteristics of private gardens
- 26 **Anna Wennekamp**
The role of MUC13 in intestinal barrier integrity and Salmonella invasion
- 27 **Corinde Warmerdam**
Differentiation of Human induced Pluripotent Stem Cells towards notochordal-like cells: The role of tissue source
- 28 **Chiron Morsink**
Quantitative CT imaging and dose reconstructions of holmium-166 microspheres.
- 29 **Joaquin Montilla-Rojo**
Understanding the role of TP53 in the malignant behavior of human pluripotent stem cells
- 30 **Shicheng Ye**
Bioengineering Human Liver Tissues using Epithelial Organoids and Mesenchymal Cells
- 31 **Nikae te Moller**
Anatomic localization of motor entry points in the facial muscles of the horse
- 33 **Henriette Booij-Vrieling**
Analysis of the relation between shedding incisor teeth and the age of pups among different dog breeds.
- 34 **Ainhoa Larreategui**
Extreme fibrous corona plasticity ensures maintenance of ploidy during mammalian oocyte meiosis
- 35 **Xiaole Tong**
Directed differentiation of induced pluripotent stem cells to notochordal-like cells by combinatorial transcription factors activation
- 36 **Thaiz Emerencia**
Fibrous Corona shows extreme expansion in mammalian oocytes
- 37 **Deepani Poramba-Liyanage**
Single-cell understanding of intervertebral disc degeneration yields new treatment strategies
- 38 **Isabella Barale**
Abnormal behaviour and structure of the centrosomes in the first mitotic division in mammalian zygotes
- 39 **Niels Blees**
Assessment of the bioavailability of collagen hydrolysates after oral intake in dogs
- 40 **Beatrice Cornu Hewitt**
Antimicrobial resistance genes in the upper respiratory tract of COPD patients and controls in relation to air pollution from livestock farms
- 41 **Marina Meester**
Refinement in epidemiological research: non-invasive sampling methods to study hepatitis E virus in pig farms
- 42 **Marina Meester**
Hepatitis E virus transmission can be contained on endemically infected pig farms
- 43 **Yao Shi**
The glycosyltransferase SCWPI affects the composition and function of the rhamnose-rich cell wall polysaccharides of Streptococcus suis

45	Kitty Exel Association of Staphylococcus aureus genotypes with milk or colonization of extramammary sites in Dutch dairy cattle indicates strain variation in reservoirs for intramammary infections
46	Aniek Lotterman Personal exposure of Dutch goat farm workers to PM10, inhalable dust and endotoxin
47	Stefanie Horst Determination of pharmacokinetics of doxycycline in broilers kept under field conditions
48	Pascalie Roulaux Desexing dogs as a means of decreasing the generally regarded sexually dimorphic behaviors of urine marking, mounting, and roaming
49	Naomi Benne Antigen-specific tolerogenic liposomes prevent the development of rheumatoid arthritis in mice
50	Ceder Raben How different livestock farm types affect spatial exposure patterns of particulate matter and ammonia
51	Yvette Geus Determinants for individual total bacterial count in goats' milk around kidding: a longitudinal study.
52	Merel Ritskes-Hoitinga Towards green and animal-testing free science at IRAS TOX
53	David Inauen Review of available public and literature resources for the structured collection of data and models in farm animals, wild animals and birds
54	Tom Roos CardioDox: Towards Development of a Personalized Physiologically Based Pharmacokinetic Model to Predict Cardiac Doxorubicin Concentrations in Dogs
55	Inge Wouters Short-term temporal variation in a livestock dense area in the Netherlands of PM2.5, secondary inorganic aerosol, endotoxin and ammonia ambient concentrations.
56	Alex Bossers Environmental metabarcoding demonstrates potential transmission of avian influenza via airborne particulate matter through air inlets into poultry houses
58	Galac group
59	Lesscher group
61	Brommer group
62	Gröne group
63	Arndt group
64	Vet PhD-council
65	EDI commissie
66	CCI
67	3R-centrum - digitale ATEX systeem
68	Flow cytometry facility
69	WED-paard
70	WED-GD
